4Color System™ — Pro/Elite Upgrade Official Announcement

We're not here to decorate charts. We're here to expose what price is actually doing.

What's New (Pro/Elite Upgrade)
We are upgrading Elite to better react to real-time market conditions by integrating:
• Liquidity Candles — see where liquidity is being built, swept, or absorbed
• Execution Context — track the current phase of price (Compression → Rejection → Expansion)

This is not another "signal layer."
This is behavioral confirmation built into the candle itself.

📊 Mini-Infographic: Before → After → Elite

Before
🟢🔴 4Color Candles
⚪ FVG tracking
Reactive in fast conditions
Manual context interpretation

After
🟢🔴 4Color + Liquidity Awareness
📌 Execution context labeling
Detects traps, absorption, compression
✅ Smarter real-time reaction

Elite Enhanced
🟢🔴🟡🔵 4Color + Full Liquidity + Execution Context
Immediate insight into control & intent
No guessing, no delay
See who's winning before others do

Bottom Line
Pro shows structure.
Elite now shows intent.

Same chart.
Different level of understanding.
