STOP MEMORIZING 20+ CANDLE PATTERNS

Doji… Hammer… Shooting Star… Engulfing…
You really think the market cares what you call it?

That's why most traders stay stuck.

Here's the truth:

There are ONLY 3 candle behaviors you need to understand:

1) COMPRESSION (Doji)
Market is loading. No clear winner.
→ Something is coming.

2) REJECTION (Wicks)
Price tried… got denied.
→ Someone stepped in HARD.

3) EXPANSION (Strong body candles)
One side takes control.
→ This is where money moves.

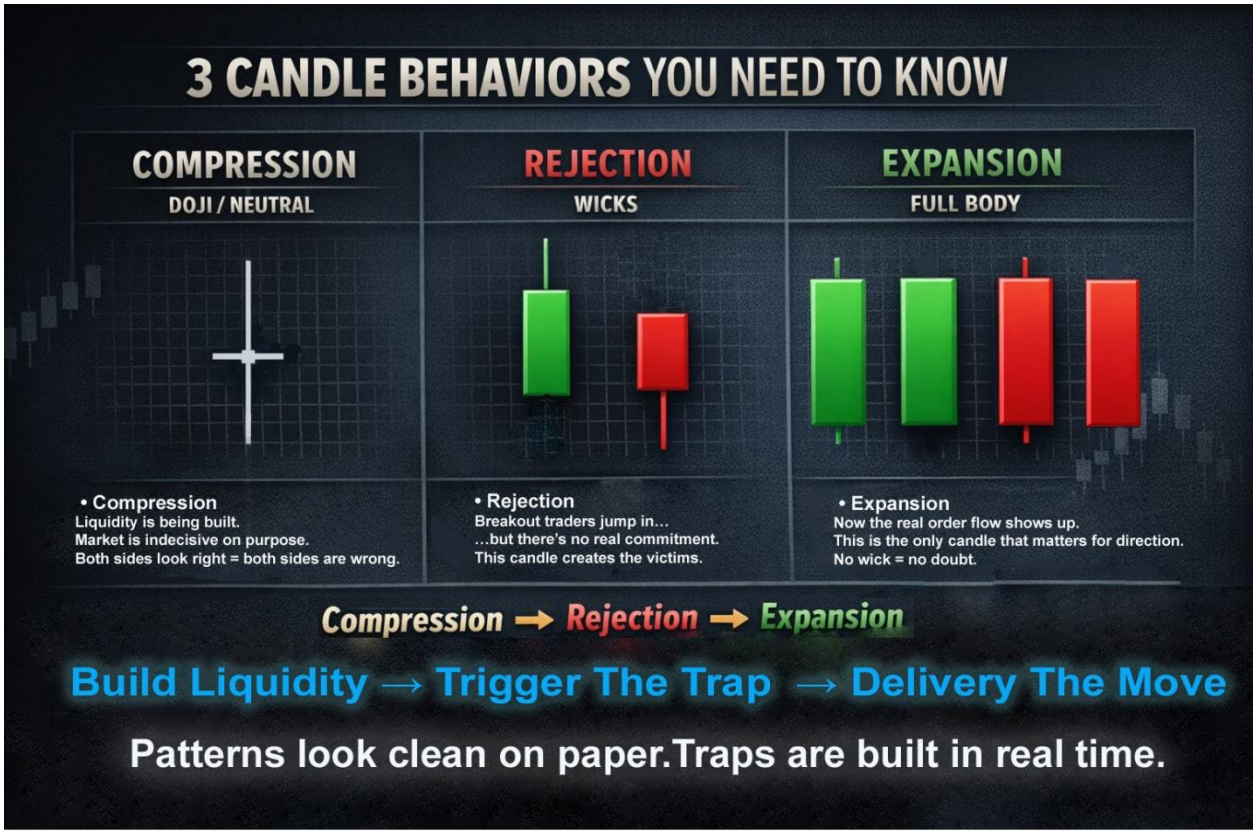
That's it. No magic names. No guessing games.

The real edge is not the candle…
It's the sequence:

Compression → Rejection → Expansion

That's how traps form.
That's how moves start.
That's how retail gets wiped.

Old way:
"What pattern is this?"

Smart way:
“What is the market doing right now?”


Upgrade your view.
Or keep collecting candle names while the market collects your liquidity.
